

## Site Manager Laboratories (m/f) – ID 400103

### The Company

Our customer is a laboratory group operating throughout Europe, with roughly 1,400 employees at 20 branch offices. In terms of value for money, it is proud to be one of the European market leaders in the areas of agricultural, environmental, water, food and feed analysis. The basic pillars of their collaboration are high degree of responsibility, strong team spirit and personal development.

We are currently looking for “Site/Plant Manager” at one of our customer’s locations in Netherlands.

### Your Tasks and Responsibilities

- Overall operative management of the site and direct supervision of the administrative staff, laboratory managers, CRM managers and quality managers
- Verification of all invoices and handling of overdue payments
- Complaint management and coordination of all administrative tasks
- Purchase of small appliances and hiring and release of personnel
- Compliance with the budget and controlling the effectiveness and efficiency of all workplaces
- Strategic development of the site in cooperation with the management
- Investigate demands and propose investments in building matters and lab equipment

### Who you are

- Completed degree in natural sciences, e.g. doctorate
- Deputy Managing Director of a site or in individual cases, also highly qualified and experienced laboratory managers or QM.
- The candidate should have at least 10 years’ experience in a managing position of a manufacturing company in environmental analysis, food and chemistry with at least 30-50 employees.
- Candidate should have integrational skills, international mind-set, detailed process knowledge and empathy

### **What we offer**

- Competitive pay including base salary, bonuses, long- and short-term incentives and retirement benefits.
- Excellent opportunities for professional and personal development.
- A motivating corporate culture at a European industry leader
- Trust-based working time
