

Chemist as Material Scientist (m/f/d) – ID 200191

The Company

Our customer is a company with a very long history in the chemical industry sector. The company develops and manufactures materials for various industry segments. A high focus on innovation, a global market mentality and a high customer focus are the foundation for the long-term success.

Currently, we are looking for a Chemist as a Material Scientist (m/f/d) at one of our customer's locations in Austria.

Responsibilities

- Leading a department within corporate R&D with focus on development, synthesis and application of catalytic functional materials
- Project management and development from laboratory to industry scale
- Synthesis of new inorganic materials
- Patent Management
- Leading project teams

Your profile

- University degree in the field of inorganic chemistry or material science
- Relevant experience in the field of catalytic functional materials
- Relevant experience in the application of catalytic functional materials
- Project management, product development and leadership skills
- High personal commitment
- Fluent English

What we offer

- Excellent opportunities for professional and personal development
- An exciting position in an international environment
- Work in a highly motivated, committed and open-minded team
