

Technical Manager (m/f/d)

ID 400120

The Company

Our customer is the leading used oil processing company in Europe and the USA. It has a capacity of approx. 170,000 tons in the oil upcycling segment and seen as the technological leader in producing high-quality base oils and lubricants.

Currently, we are looking for a 'Technical Manager (m/f/d)' on a contract or permanent basis in North Brabant area.

Responsibilities

- Management of all relevant quality processes at the site, including
 - Quality assurance of incoming raw materials
 - Final product quality assurance
- Leading a small lab team
- Execution of sustenance and improvement projects
- Responsible for the reliability process at the site
- Process improvement.

Requirements

- Degree in chemical engineering, process engineering or similar
- A minimum of 5 years relevant work experience
- First leadership experience

- Hands- on mentality

What we offer

- Excellent opportunities for professional and personal development.
- An exciting position in an international environment.
- Work in a highly motivated, committed and open-minded team.
