

Global Process Manager, Product Portfolio Management (m/f/d)

ID CB06192

The Company

Our customer is a cutting-edge technologies and services provider for the global construction industry segment. It is a great place to bring value and grow your career. Currently they have close to 30000 employees, which they are looking to expand.

Currently, we are looking for a 'Global Process Manager, Product Portfolio Management (m/f/d)' in Liechtenstein.

Responsibilities

In this challenging global role, your 3 core areas of responsibilities will be:

1. You will partner with the various business units and cross functional communities to develop and enhance the frameworks of related PPM (Product Portfolio Management) processes to drive customer engagement.
2. You will drive strategic initiatives and ensure operational excellence along the product life cycle. As a champion of Agility, you will be the sparring partner for cross functional projects to bring concept to market in most lean and efficient way.
3. You will enhance global toolchain of systems and applications used in the product development and deployment environment (including standardization and release management).

Requirements

- Master studies in the field of technology or business administration; PhD/ MBA is a plus
- At least 5 years of professional experience with distinguished expertise in project management
- Strong analytical and conceptual skills, with a working knowledge of systems and tool chains
- Proven project/process management skills in a matrix organization
- Exceptional written and spoken communication and presentation skills in English; German is a plus

What we offer

- Excellent company culture which stands for an ambitious but caring working environment
- Great opportunities to develop your career with a global player and international innovation driver
- Competitive salary and a wide range of benefits, these may include day care for your kids or a free in-house gym
