

Global IT Senior Solution Architect Tool Services (m/f/d)

ID FM07191

The Company

Our customer is a leading technology and service provider for the global construction industry segment. It is a great place to add value and grow your career. Currently they have close to 30000 employees, which they are looking to expand.

Currently, we are looking for a 'Global IT Senior Solution Architect Tool Services (m/f/d)' in Switzerland.

Responsibilities

- You will architect the next generation solution platform for fleet management customers. As an experienced professional, you will develop the architecture of next generation digital solutions. Based on the “big picture” of the business, you will create architectural approaches for software design and implementation to guide the development team.
- Your work will combine elements of smart tools and batteries, digital process, machine learning and predictive maintenance providing new business use cases through a new flexible microservice architecture.
- You will get to work with most of advanced technologies combining classical backends (S/4 HANA, CRM) with new cloud based (AWS, Microservices – Rest/SOAP, Hybernate, Spring) and frontend solutions like Angular JS, HTML5 to deliver technology as a strategic advantage.
- As part of a global agile working team you will coordinate across different solution verticals and external partners.

- Specifically, this role will work together with the project team to design a next generation software platform that will deliver technology as a strategic advantage. This new platform will leverage advanced scalable architecture and will absorb latest technologies such as cloud computing, internet of things, machine learning and big data.

Requirements

- Master's degree in Information Systems, Computer Science, or related fields (PhD preferred).
- Proven multiyear experience in a full-time technology role in software development, system integration, cloud computing or enterprise architecture.
- Solution Architecture experience designing and implementing complex enterprise applications.
- Proven business acumen and customer focus providing solutions to add value.
- Demonstrated strong analytical, problem-solving, organizational, interpersonal, and communication skills.
- Fluent in English (verbally and written).

What we offer

- Excellent company culture which stands for an ambitious but caring working environment.
- Great opportunities to develop your career with a global player and international innovation driver.
- Competitive salary and a wide range of benefits, these may include day care for your kids or a free in-house gym.
