

Project Manager Basic Development (m / w) Development of massive forming - ID RD230819

The Company

Our customer is one of the world's most successful manufacturers of steering systems and a technology leader in the area of solid forming. In this way, they create the technological prerequisites for steer-by-wire, electric mobility or autonomous driving. Together with more than 9,000 employees at 17 locations and the world's most famous car manufacturers, they are putting the future on the road. Passion for the automobile, dynamism, innovation and do-it-mentality - this distinguishes them in their work along with pursuit of highest safety and quality.

Currently, we are looking for a 'Project Manager Basic Development (m/f/d)' in Liechtenstein.

Responsibilities

- Development and implementation of concepts to increase the service life of forming tools
- Advisory function and interface between development, toolmaking and production regarding tool topics
- Management of basic projects in cooperation with development

Requirements

- University degree in the direction of mechanical engineering or comparable field of study.
- Knowledge of forming and tool technology
- 3D CAD knowledge

- FEM knowledge (structural mechanics or process simulation) is desirable
- In-depth Excel knowledge (possibly macro programming)
- Good German and English knowledge

What we offer

- Excellent company culture which stands for an ambitious but caring working environment.
- Great opportunities to develop your career with a global player and international innovation driver.
- Competitive salary and a wide range of benefits, these may include safety and healthcare programs or a free in-house gym.
