

Regional IT Infrastructure Unified Communication and Network Specialist (m/f/d)

ID AS08191

The Company

Our customer is a leading technology and service provider for the global construction industry segment. It is a great place to add value and grow your career. Currently they have close to 30000 employees, which they are looking to expand.

Currently, we are looking for a 'Regional IT Infrastructure Unified Communication and Network Specialist (m/f/d)' in Liechtenstein.

Responsibilities

We are looking for a passionate person in charge of the telephone system (Unify OpenScape 4000), video conferencing and the network environment in the headquarters in Liechtenstein, who will also support our strategy for telephony of the future and be an active part of respective change management activities. This includes:

- You are responsible for ensuring that the Unify OpenScape 4000 telecommunication system runs properly, that the necessary updates have been made and that a sustainable strategy for the future of unified communications in and around the headquarters is ensured and implemented.

- The telephone system in the q is closely linked to the facilities in Germany, Austria and Switzerland. Our customer has video conference enabled meeting rooms, hence working closely with colleagues from these countries and teams from Global IT (Digital workplace collaboration team) is very important.
- In the context of developing strategies for future telephony change management is also an important topic.
- The network structure for the entire headquarters is part of the entire Group network, which requires close cooperation with Global IT in Switzerland, Asia and USA.
- are responsible to ensure that tickets affecting the LAN and WLAN network in the headquarter and the surrounding area are quickly resolved. In doing so, you use your own skills and those of our external partners.
- By translating business needs into a high-performing and future-proof unified communication and network setup, you will be a key enabler for the business excellence and digital aspirations. For this exciting challenge, you will collaborate with other cross-functional Business and IT teams as well as with external partners.

Requirements

- University degree in IT, Engineering or Science.
- Experience with enterprise-level networking, e.g. LAN, WAN, WLAN.
- Experience with enterprise telecommunication, e.g. Unify, Cisco.
- Experience with tools for root cause analysis.
- Excellent interpersonal, organizational, communication and team skills.
- Excellent change management expertise.
- Fluent English, German is a plus.

What we offer

- Excellent company culture which stands for an ambitious but caring working environment.
- Great opportunities to develop your career with a global player and international innovation driver.
- Competitive salary and a wide range of benefits, these may include day care for your kids or a free in-house gym.
