## Strategic Project Controller and Process Manager (m/f/d)

ID AT08191

### The Company

Our customer is a leading technology and service provider for the global construction industry segment. It is a great place to add value and grow your career. Currently they have close to 30000 employees, which they are looking to expand.

Currently, we are looking for a 'Strategic Project Controller and Process Manager (m/f/d)' in Liechtenstein.

### Responsibilities

You will lead the global definition of the purchase-to-pay process and system landscape in Procurement Indirect Materials. You design, develop and implement solutions to improve process efficiency, data transparency and compliance with state-of-the-art technologies like SAP ARIBA. You will orchestrate our Regional Finance and Procurement teams across the globe to provide a standardized global framework. You will ensure that we have the right technologies in place and leverage their usage across all global departments. You train yourself to gain a deep understanding of the system landscape first to become a driving force of our digital transformation journey. This will include:

- Your work starts with a detailed understanding of our customer's current processes, systems & tool landscape. It gives you the necessary insights and the fact base.
- You will then initiate and lead strategic projects to ensure operational excellence along the purchase-to-pay process involving existing or new solutions.
- As a champion of project management excellence, you start with conceptual and strategic brain work and analysis to define optimal processes on a global level.
- You make it concrete by formulation implementation roadmaps and lead the change management process.
- Stakeholder management is key: you align global rollouts with regional organisation and orchestrate a global project team.
- Large, strategic projects are then in your direct responsibility. There can be bumpy roads as we procure in many different ways.
- So, although we are now well established, you need a broad personal portfolio to earn your seat at the table of the executive decision makers.

## Requirements

- Master studies in the field of supply chain, technology or business administration; MBA is a plus.
- At least 5 years of professional experience with distinguished expertise in project management.
- Strong analytical and conceptual skills with a working knowledge in process architecture
- Exceptional written and spoken communication and presentation skills in English; German is a plus.
- Profound MS Offices skills; high level or affinity of IT systems such as SAP S4/HANA and SAP ARIBA.

## What we offer

- Excellent company culture which stands for an ambitious but caring working environment.
- Great opportunities to develop your career with a global player and international innovation driver.
- Competitive salary and a wide range of benefits, these may include day care for your kids or a free in-house gym.
