

Technical Management / Divisional Management Softlines (f/m/d) ID 400124

The Company

Our customer offers services such as product testing, certification and inspections of consumer goods, e.g. Textiles, footwear, leather goods, hardware, toys and electrical and electronic products, and works with leading manufacturers, importers, wholesalers and retailers worldwide to ensure that their products meet safety, control and quality requirements.

Currently, we are looking for “Technical/Divisional Manager (m/f/d) at one of our customer’s locations in Hamburg.

Responsibilities

- Responsible for the operational management of the area to meet the needs of the market and customers
- Identify, develop and implement developments such as continuous process improvement to increase laboratory productivity
- Planning of the equipment and operational resources of the area including the recognition of new test fields, market trends and testing techniques
- Expert activities in case of problems and claims for customers and their supply chains including the development of problem-solving strategies, as well as the consultation, planning, execution and documentation of studies.
- Responsible for the safety requirements of the chemical-analytical laboratory and introduction of technical competence (chemical, technical) in various working groups in the area of responsibility.
- Advice and support of the sister company in technical and operational issues
- Develop employees for advanced tasks and demanding and living through transparent communication in the department
- Professional support of customer service and sales during customer visits.

Your profile

- Diploma chemist (ideally graduated) or chemical engineer with many years of experience
- Several years of experience in chemical testing, ideally in consumer products.
- Knowledge of material compositions, properties and production techniques
- Experience in leading teams and high competence in dealing with test methods and their technical and legal backgrounds.
- Implementation of the quality assurance aspects of an accredited area.
- Business thinking and strong customer orientation
- Self-motivated hands-on approach and decision-making authority

What we offer

- Excellent opportunities for professional and personal development
- An exciting position in an international environment
- Work in a highly motivated, committed and open-minded team
- A competitive compensation package
