

Technical Project Manager – ID MG090320 (m / f)

The Company

Our customer is characterized by a high degree of engineering services. They develop and produce innovative products for the automotive industry. For this, the company offers its employees everything they need to tackle tomorrow's challenges: appealing work on trend-setting projects both nationally and internationally, project-oriented work within a large group that continues to operate as a mid-sized organization, teams that get along with one another, and the latitude for outstanding personal development.

Currently, we are looking for a 'Technical Project Manager' in Liechtenstein.

Responsibilities

- You are responsible for the overall technology of the product: from the design phase to handover to production in the Steering EPAS area in acquisition and series projects of the customer Volvo / Geely
- You and your team, which you lead professionally, develop an EPAS product design that meets the requirements of all relevant technical points (safety, manufacturability, customer requirements, functions, friction, acoustics, dynamics)
- The merging and monitoring of the various subsystems (engine, ECU, sensor, mechanics) and their interfaces to a functioning overall system is also your responsibility
- In this function, you are the main technical contact person to the customer and regularly hold system meetings with your project team
- You are also responsible for ensuring that the subsystems are reported, merged and prepared for project reporting at the system level, as well as ensuring and coordinating technical change management

- With your team, you identify and evaluate the system-technical risks and develop and control countermeasures
- The overall technical approval of the product and the approval of the system design (PLM) round off your profile

Requirements

- You have a degree in mechatronics, mechanical engineering or the like
- You have several years of professional experience (at least 5 years) in the automotive sector as well as project management experience
- You have good analytical skills, work independently and can present complex issues in a transparent and structured manner
- In addition to German, you can also express yourself confidently in English (spoken and written)
- We assume international willingness to travel

What we offer

- Flexible working time models.
- Ergonomic workplaces, fruit days, fitness and training facilities, weekly sports courses, running clubs and other flexible offers for health promotion and prevention.
- A company pension scheme highly subsidized by the employer.
